Marcelo Gomes Marques

Senior Data Engineer & Solution Architect
Brazil

Summary

Senior Data Engineer, Data Scientist, and BI Specialist with over 25 years of experience leading end-to-end data and analytics initiatives across multi-cloud environments. Expert in designing scalable, cloud-native architectures on AWS and GCP, including data pipelines, ETL/ELT workflows, event-driven architectures, real-time data streaming, modern data warehousing, and advanced analytics, with a focus on governance and optimization. Proven track record in cloud migrations, platform modernization, and digital transformation, with a focus on building high-impact analytics platforms. Trusted advisor to C-level stakeholders, translating business challenges into actionable, data-driven solutions. Specialized in data engineering, distributed processing, event-driven pipelines, data streaming frameworks, and AI/ML integration into modern platforms. Adept at leading cross-functional teams, aligning solutions with business goals, and transforming complex data into insights that drive enterprise value.

Experience

Vitarts

Senior Data & Analytics Architect & Engineer
January 2016 - Present (10 years 5 months)
Rio de Janeiro Area, Brazil

- Led data architecture and analytics initiatives aligned with business strategy, promoting corporate governance and management of data and intelligence assets.
- Designed and implemented end-to-end data platforms, ensuring scalability, performance, and reliability.
- Acted as a full-stack engineer, developing and maintaining solutions across multiple cloud platforms, programming languages, and frameworks.
- Designed and maintained semantic layers to enable consistent and efficient analytical consumption.

- Managed data infrastructure using Terraform and Kubernetes, ensuring automation, resilience, and high availability.
- Served as a trusted advisor to leadership, supporting data-driven strategic decisions.
- Led technology modernization initiatives, focusing on cloud adoption and big data architectures.
- Executed migrations of complex environments, including multi-cloud scenarios.
- Performed data cleansing, transformation, and preparation for analysis and machine learning model training.
- Developed and applied algorithms for data processing, transformation, and indexing.
- Implemented and operationalized generative AI and machine learning solutions.
- Translated complex business problems into scalable, value-driven analytical solutions.

BairesDev

BI Analyst & Data Engineer

April 2019 - March 2026 (7 years)

Brazil

Senior Data Engineer | BioIntellisense - 6 years

Developed and evolved a continuous patient monitoring platform using wearable IoT devices, with a cloud-native architecture for large-scale batch and streaming data processing:

- * Built real-time and batch pipelines for IoT health data
- * Partnered with stakeholders to define problems, requirements, and opportunities
- * Collaborated with data scientists and product owners on story decomposition, estimation, prioritization, and dependencies
- * Managed cross-team dependencies
- * Supported UAT and acceptance criteria definition
- * Designed event-driven architecture with Confluent
- * Implemented distributed processing (Flink, Dataflow, Databricks)
- * Built S3-based Data Lake and transformation pipelines
- * Developed APIs and backend services (Python, Java, C#)
- * Applied security practices
- * Built scalable distributed systems for analytics and delivery
- * Migrated platform from GCP to AWS
- * Used Claude Code, Copilot, MVC, and AI prompting to boost productivity

Stack: AWS, GCP, S3, Kafka (Confluent), Kinesis, Pub/Sub, Flink, Dataflow, Databricks, Lambda, Cloud Function/Run, Python, Java, C#, MongoDB, BigQuery, Redis, Docker, Kubernetes, Terraform, CI/CD, Protobuf, Avro, Copilot, Claude Code

BI Analyst & Senior Data Engineer | IPG Mediabrands - 1 year

Delivered end-to-end BI and data engineering solutions, covering ingestion, modeling, and visualization for multiple clients:

- * Unified reporting for Mediabrands agencies (UM, Initiative)
- * Built ingestion and integration pipelines from multiple sources
- * Modeled Data Lakes/Warehouses, ETL/ELT, and data marts
- * Standardized datasets and reporting layers, accelerating onboarding
- * Implemented business rules and analytics customization
- * Monitored data quality and availability
- * Created validation and exception reporting processes
- * Transformed Data Lake data for BI/reporting
- * Generated insights for campaign optimization

Stack: AWS (S3, Glue, Athena), Apache Spark, Python, Tableau

True Information Technology

Data Scientist

January 2020 - December 2020 (1 year)

Porto Alegre, RS

Delivered end-to-end data science and data engineering solutions for emergency services and public safety, enabling reliable data pipelines and actionable insights for critical operations.

- * Partnered with stakeholders to translate business requirements into scalable data solutions
- * Led ML discovery workshops (story mapping and impact mapping)
- * Defined epics, features, and user stories with clear acceptance criteria and measurable ML success metrics
- * Created process flows and data flow diagrams for analytics use cases
- * Designed and built data ingestion and ETL pipelines (SQL, Python) across multiple heterogeneous data sources
- * Developed integrations using APIs, C# microservices, and automated data extraction (Selenium)

- * Processed and transformed large-scale datasets, improving data usability and analytical readiness
- * Applied algorithms for data transformation, enrichment, and indexing to support analytics use cases
- * Designed and implemented Data Lake and Data Warehouse models for structured data consumption
- * Established data quality and monitoring processes to ensure accuracy, reliability, and timely data availability
- * Supported UAT and acceptance criteria definition

Tech Stack:

Python, SQL (SQL Server, PostgreSQL), C#, APIs, Selenium, Data Lake, Data Warehouse, SharePoint, and Azure DevOps

Accenture

Senior Manager

October 2014 - December 2015 (1 year 3 months)

- Work with client teams to diagnose problem areas and contributing to architecting the solution.
- Work with sales teams to provide subject matter expertise and solutioning support for important client proposals and RFPs, being comfortable presenting to a C-Level business audience
- Devise solutions to client business problems that take advantage of data driven analytical techniques.
- Develop and interpret statistical models
- Support the delivery of client work with analytical modelling and the development of new client opportunities
- Communicate Analytics models and results to non technical audiences, in both verbal and written formats.
- Lead, mentor and coach of co-workers and client teams
- Support and consult on complex financial analyses and support the develop business cases in conjunction with industry and/or opportunity analyses

Estácio Participações

BI Manager

December 2011 - February 2014 (2 years 3 months)

Rio de Janeiro e Região, Brasil

- Promote the strategic alignment between business and IT services with a focus on BI;
- Propose the models for data governance and services;

- Lead end-to-end BI/ML projects, from requirements gathering to backlog management and delivery, using agile methodologies;
- Facilitate brainstorming sessions and requirements gathering
- Lead end-to-end BI /ML projects, from requirements gathering to backlog management and delivery, using agile methodologies.
- Led discovery workshops to define epics, features, user stories, and their impact mapping, with clear acceptance criteria and measurable success key metrics;
- Owning BI backlogs and running all BI agile sessions: planning, daily, grooming, and retros
- Supporting the design solutions of BI;
- Promote best practices of BI across the organization;
- Mapping BI and ML skills;
- Propose / Adapt / Extend the standards, policies, frameworks, and methodologies of BI.

Hewlett-Packard

Solution Architect and Project Manager

October 2009 - November 2011 (2 years 2 months)

Projects Assignment History:

NII/Nextel: Aug/11 to Oct/11 – Global BI/DW - Brazil

Rules: Project Manager & Solution Architecture Project Type: Information Integration

- Management resource of development and infrastructure to integration of Brazil to the global project;

Vale, CCEE, BRF, BR Dist. and Nextel: Feb/11 - Oct/11 – New Business Development

Rules: Solution Architect & Proposal Leader Project Type: BI and Information Integration

- Opportunities identification and respond to RFPs;
- Proposals preparation and conduction;
- Technical and business visits to customers;

Vale: Oct/2009 – Jan/2011 – VIP Mining Program Management

Rules: Project Manager & Solution Architecture Project Type: Portfolio Management and Information Integration

- Program management: 10 consultants, 8 Vale's employees and 350 stakeholders;

- Roadmap definition of BI initiatives and information integration;
- Identifying opportunities, negotiating and preparing / conducting proposals;
- Support analysis and prioritization of demands, projects and initiatives;

Vale: Aug/10 - Jan/11 – VIP Mining GPV

Rules: Project Manager Project Type: Information Integration

- Integration of VIP Mining with the GPV Mining and Porto;
- Technically improve the solution by reviewing and parameterization the current maps.

Vale: Sep/10 - Nov/10 – VIP Mining Improvements

Rules: Project Manager Project Type: BI Maintenance

- Development and implementation of improvements in VIP Mining solution.

Vale: Jan/10 - Jun/10 – VIP Mining Mass Operations

Rules: Project Manager Project Type: BI Implementation

- Provide a more comprehensive and integrated view of mass operations at Brazil;
- Contribute to the alignment and improving the quality of information;
- Increase productivity in the preparation of operations management information.

IBM Global Services

Project Manager, BI and Oil&Gas Consult

September 2004 - September 2009 (5 years 1 month)

Projects Assignment History:

Petrobras: Nov/08 to Sep/09 – CBM and Portfolio Management to Information Integrated of EHS

Rules: Project Manager and Proposal Leader

- Project Management: 4 consults, 6 Petrobras' employees and 78 stakeholders
- Design EHS Business Components Model; Identify and definition of integration projects; management IT portfolio of EHS.

Brasil Telecom: Aug/2008 to Sep/2008 – Strategy Definitions to Implementing Data Integration Corporate Environment

Rules: Project Manager

- Review of the integration company strategy and re-structuring processes on base of best practices.

Petrobras: Apr/07 to Aug/08 – DIIE v2.0 and RDE v2.0 – Meta DIIE
Implementation

Rules: Technical Leader, Solution&Information Architect and Proposal Leader

- Leadership of 38 resources.
- Coordination of work involving BI solution definition and implementation.

Petrobras: Nov/2006 to Mar/2007 – Detailing of IT Portfolio of Downstream

Rules: Technical Leader, Solution Architect and BI Specialist

- Detailed design of IT project of Downstream IT portfolio for integration of information, standardization of applications and supporting the implementation.

Petrobras: Jan/2006 to Jun/2006 – DIIE Solution Review Rules: BI Specialist,
Information Architect and Business

- Diagnosis and review of the DW and DM solution.

Petrobras: Feb/2005 to Dec/2005 – Information Integration of Downstream

Rules: BI Consult, Oil&Gas Specialist and Solution Architect

- Conceptual data modeling; Diagnosis of problems in information / systems; Definition information governance process and structures; Portfolio Definition and prioritization.

BASF: Sep/2004 to Jan/2005 – Solutions for Enterprise Environment DW
(SEED)

Rules: BI Consult

- Review of the current DW and proposition of the solution SEED for South America
- Identifies of the KPIs, information mapping, design the conceptual model, Gaps analyzes, estimates the benefits and elaboration a business case.

CASA&VIDEO

Business Analyst

May 2004 - July 2004 (3 months)

- Demand management, project management, formulation of internal proposals and RFPs;
- Modeling: data in Erwin and processes in Vision.

Shell Brasil Ltda.

Retail Network Planning

December 1997 - January 2004 (6 years 2 months)

Aug/2000 to Jan/2004 - SHELL BRASIL LTDA – RETAIL NETWORK
PLANNING

Net. Development Strategy Assessor – EAST LA

- Responsible to information integration, data definitions and concepts;
- Validation and delivery information and market analysis;
- Monitor and support the disinvestment actions;
- Leadership development of RADAR (Retail Asset Database for Analysis & Reporting): BI of the gas station network with market data and integration of enterprise systems;
- Development the prototype and the business case of the Radar project;

Aug/1998 to Jul/2000 - SHELL BRASIL LTDA – SUPPLY AND DISTRIBUTION
Logistic Analyst

- Programming, optimization and monitoring of transport fuels;
- Development of the Scheduler's (Data Mart of logistics);
- Assessment and logistics solutions;

Dec/1997 to Jul/1998 - SHELL BRASIL LTDA – TREASURY
Information Commissioner

- Responsible of exports and imports information;
- Design and development of Sherlock (BI system & automate work with Siscomex and banks);
- Definition of the new methodology of registration procedures for imports and exports.
